Twinkly Icicle Special Edition – 190 RGB+W LED Icicle Lights String, 16 Million Colors + Warm White – Generation II

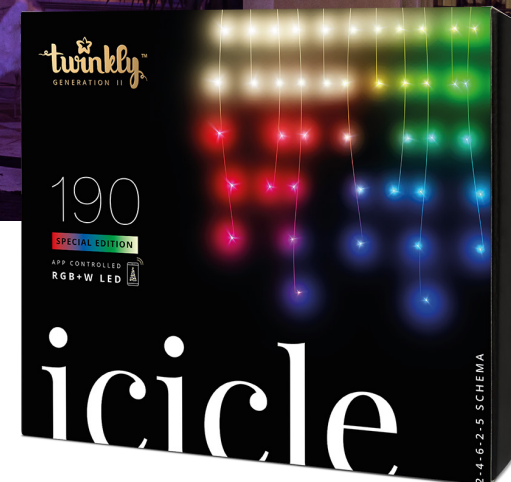

Twinkly Icicle Special Edition – App-controlled LED Icicle Lights String with 190 RGB+W (16 million colors + pure Warm White) LEDs. Transparent wire. Indoor and outdoor smart lighting decoration.

Twinkly Icicle Special Edition is a smart LED lights string that can be controlled via app and vocal assistants. With 10 series of drops in a 2-4-6-2-5 schema, consisting of 190 RGB + Warm white 5 mm clear and diffused flat lens LED, specifically designed with a flat head to reach impressive brightness levels and perfect tone of color, Twinkly Icicle goes beyond the traditional decorative Christmas lighting with a Bluetooth® and Wi-Fi controller and a state-of-the-art smartphone application, bringing new levels of lighting design and creativity in and out of your connected home all-year-round. Like all Twinkly products, Icicle can be mapped and every single LED can be controlled individually, allowing you to create and reproduce unique effects, gradients, and color animations – Icicle becomes your screen. Easily configurable via Wi-Fi and Bluetooth®, Twinkly Icicle is controlled using the free Twinkly App, available for iOS and Android. Twinkly's App enables you to create bespoke light design installations thanks to a wide range of pre-made effects and animations, as well as the ability to create your own effects from scratch using the FX Wizard creation tool. Twinkly Icicle Special Edition can be grouped together with other Twinkly RGB+W devices to create larger, synchronized light installations. Twinkly Icicle can be controlled seamlessly with vocal assistants such as Hey Google and Amazon Alexa, as well as with Apple HomeKit, Homey, and Razer Chroma™ RGB via Twinkly Chroma Connector to enhance your gaming experience with stunning light effects that react to your gameplay. Suitable for indoor and outdoor use, rated IP44.

OTHER FEATURES. Smart controller, power adapter with plug type F (Europe) included. Fully-featured control panel with dimmer, timer and brightness. Works with Hey Google and Amazon Alexa. Works with Apple HomeKit. Compatible with Homey. Integrates with Razer Chroma™ RGB.

Long description

Twinkly Icicle Special Edition is a smart LED lights string that can be controlled via app and vocal assistants. With 10 series of drops in a 2-4-6-2-5 schema, consisting of 190 RGB + Warm white 5 mm clear and diffused flat lens LED, specifically designed with a flat head to reach impressive brightness levels and perfect tone of color, Twinkly Icicle goes beyond the traditional decorative Christmas lighting with a Bluetooth® and Wi-Fi controller and a state-of-the-art smartphone application, bringing new levels of lighting design and creativity in and out of your connected home all-year-round.

Like all Twinkly products, every single LED of Icicle can be controlled individually, allowing you to create and reproduce unique effects, gradients, and color animations.

Twinkly's patented mapping tool uses your smartphone camera to locate the precise position of each LED in the space, however they are laid out. This powerful and innovative process lets you control your Icicle like a screen: you can play professional, pixel-perfect effects and animations right on your decoration.

Twinkly's App enables you to create bespoke light design installations thanks to a wide range of pre-made effects and animations, as well as the ability to create your own effects from scratch using the FX Wizard creation tool. All effects are completely customizable: brightness, speed, intensity, and color can all be modified with a single tap. A color picker helps you choose the perfect shade from more than 16 million options, plus the full spectrum between cold white and warm white. An ON/OFF timer and general dimmer complete your control panel, providing you with unlimited possibilities to create the perfect lighting decoration. Icicle Special Edition can be grouped together with other Twinkly RGB+W devices to create larger, synchronized light installations.

Twinkly Icicle can be used in combination with Twinkly Music, a small USB device (sold separately) capable of identifying and interpreting any source of music reproduced in your environment, enabling your lights to follow the beat for a WOW-effect audiovisual experience.

Twinkly Icicle can be controlled seamlessly with vocal assistants such as Hey Google and Amazon Alexa, as well as with Apple HomeKit, Homey, and Razer Chroma™ RGB via Twinkly Chroma Connector to enhance your gaming experience with stunning light effects that react to your gameplay.

Getting started with your Icicle is super easy: a quick and intuitive setup process helps you configure your device in a matter of seconds via Bluetooth® and Wi-Fi.

Twinkly Icicle is IP44 certified, suitable for both indoor and outdoor use.
