

# Creative Sensemore Air

## Lightweight True Wireless Sweatproof In-ear Headphones with Sensemore Technology

Introducing the Creative Sensemore Air, our lightest and smallest in the True Wireless lineup, designed with a compact clamshell-shaped charging case for your travels.

We also debut our newest innovation, the built-in Sensemore technology which serves as a hearing amplifier that helps boost surrounding sound—water drips or a chat in a noisy room—hear the outside world loud and clear!

Together with many other nifty features—Ambient Mode, Active Noise Cancellation, up to 35 hours of total playtime, Bluetooth 5.2, and IPX5-certified—sense more of your world regardless of rain or shine, and have immersive audio accompany you all day.

**SENSEMORE MODE, AMBIENT MODE, AND ACTIVE NOISE CANCELLATION (ANC)** - Our Noise Control features allow you to take full control of how much surrounding sound you want to hear. Our newest Sensemore Mode amplifies sounds to let you hear everything louder and in high-definition, while Ambient Mode lets you stay aware of a busy traffic junction, and ANC blocks off unwanted environmental noises so you can fully focus and immerse yourself in your tunes

**LIGHTWEIGHT AND COMPACT CHARGING CASE** - Weighing at just 48.4g / 1.7 oz and 22% smaller than Outlier Air V3, Creative Sensemore Air's charging case is the most compact one in our True Wireless lineup. Thoughtfully designed for portability, so you can travel with it everywhere you go and tuck it away effortlessly when not in use

**TOTAL LISTENING TIME OF UP TO 35 HOURS** - Enjoy music playback for up to 10 hours on a single charge and up to 35 hours in total with a fully charged case. When the battery is low, a quick 10-minute charge gives you up to 2 hours of continuous playtime. At the end of the day, simply dock the charging case onto a Qi-certified wireless charging pad or via the USB-C charging cable, and you're set

**QUAD MICS AND CUSTOMIZABLE TOUCH CONTROLS** - Equipped with not just one but a total of four mics, the earbuds allow for better voice pickup and overall enhanced call clarity, which also allows you to activate Siri and Google Assistant easily. On top of that, you can also customize the functions via the Creative app by reassigning them through the Custom Buttons module

**IPX5 SWEATPROOF AND WIRELESS AUDIO ENJOYMENT** - With an IPX5 water-resistance rating, you can keep your music playing through rain or shine, or even while working out. Combined with the 6 mm Bio-cellulose drivers, Bluetooth 5.2, as well as AAC and SBC codecs, get ready to enjoy smooth, uninterrupted, and immersive audio
