General specs

3.5mm port

Connect a headset with or without a mic using a 3.5mm cable.

Lightning port

Pass-through charging of your iPhone with a standard Lightning cable.

No charging needed

Backbone One does not have a battery and uses minimal power from your iPhone during long gameplay sessions.

Low latency controls

Ultra-low latency powered by Apple's latest Lightning technology. Full button layout with clickable thumb-sticks and hall-effect sensor-based analog triggers.

Works with all iPhone models running the latest software · Scan the App Clip on the top of the box to check if your phone is compatible
